

Tookan Tracker

**Empower Your Fleet and Consignment Management
with Tookan Tracker's Advanced GPS Tracking**

Mastering Fleet Management for Last-Mile Delivery Companies

Last-mile delivery companies often struggle with managing their fleet, from real-time visibility issues to route inefficiency. These challenges can significantly affect their bottom line.

Tookan Tracker, a GPS device, offers a solution to these challenges by providing real-time tracking of routes, fuel efficiency, and consignment status, allowing companies to optimize their operations.

Common Pain Points for Last-Mile Delivery Companies

- Lack of real-time visibility into fleet and consignment status
- Inefficiency in vehicle routes
- Difficulty in tracking consignment status
- Unscheduled maintenance and downtime

Business Impact

- 30% loss in productivity due to unscheduled maintenance
- inefficiency in vehicle routes can lead to an increased \$1.69 per mile
- Lack of real-time visibility can lead to a 20% increase in inventory carrying costs

Introducing Tookan Tracker

Unlock The Power of Precision Tracking with Tookan Tracker - the GPS Solution for Fleet, Consignment and Fuel Efficiency

Features

REAL-TIME VEHICLE TRACKING

Tookan Tracker uses GPS technology to provide real-time tracking and monitoring of vehicles, so companies can quickly and accurately respond to issues or delays.

CONSIGNMENT TRACKING

Tookan Tracker provides real-time visibility into the status of consignments, so companies can track inventory and ensure timely delivery.

FUEL EFFICIENCY:

Tookan Tracker helps in monitoring fuel consumption, tracking fuel levels, and identifying areas for improvement in fuel efficiency.

MAINTENANCE TRACKING:

Tookan Tracker helps in scheduling the maintenance of vehicles and reducing downtime by keeping track of the vehicle health and alerting for maintenance.

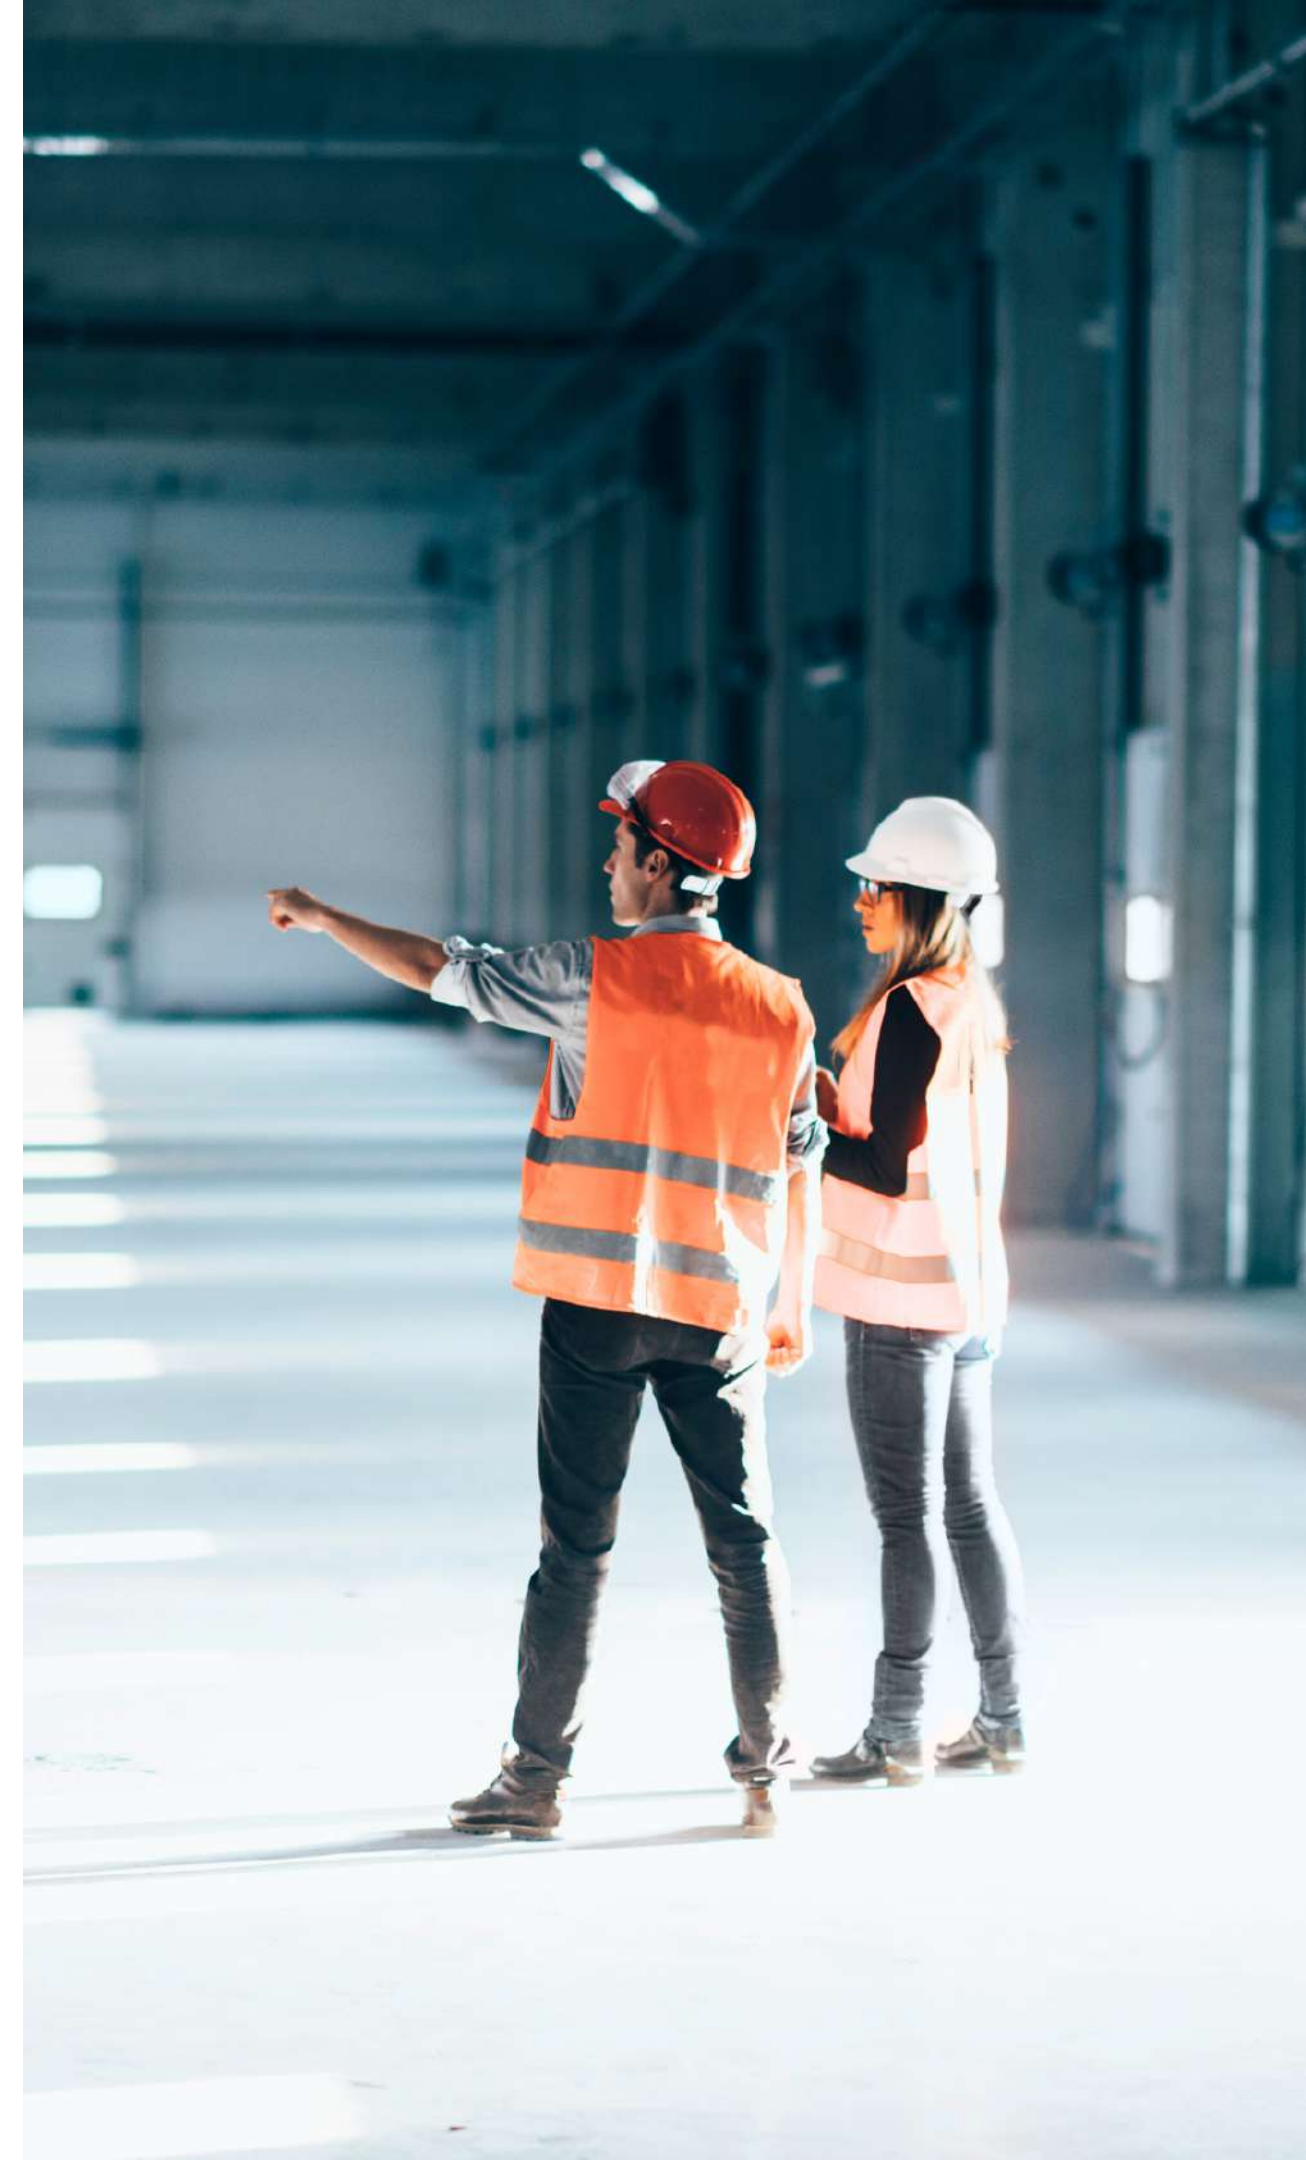

REAL-TIME ANALYTICS & ALERTS

Tookan Tracker provides detailed reports and analytics to help companies make data-driven decisions and improve their operations. It can also be used for safety and compliance, as it can be programmed to send alerts if a vehicle is driven beyond a certain radius or if the vehicle is driven over a certain speed limit.

How Tookan Tracker Can Benefit Your Business

- Improve analytics on speed of vehicle, fuel indication and tracking
- Improve operational efficiency due to regular indications of vehicle issues removing downtime or unscheduled maintenance
- Improve customer satisfaction as higher rate of delivery
- Constant updates and notifications on vehicle movement and consignment improving work efficiency
- Easy resolution of customer queries improving satisfaction
- Visibility on fuel levels and saves money due to accurate fueling

Take Your Fleet Management to the Next Level

Tookan Tracker is a powerful tool for last-mile delivery companies that need real-time visibility into their fleet's performance and consignment status. With improved analytics, operational efficiency, and customer satisfaction, Tookan Tracker can help your business **save time, money, and improve performance.**

Tookan tracker seamlessly integrates with Tookan or any other fleet management software providing real-time insights with a click.
